

**Diamond and Cubic Boron Nitride Grinding Tools with Electroplated Bonds**

**1. Identification of the Substance / Preparation and Company / Undertaking**

Product name: Diamond and CBN Grinding Tools with Electroplated Bonds

Supplier: Günter Effgen GmbH  
Am Teich 3-5  
D-55756 Herrstein

Authorized person: Dr.Beetz, sen. Technical Director Electroplated Bonds  
Dr.Paulus jun. Technical Director Electroplated Bonds

Phone: +49 (0) 6785 / 180  
Mail: [info@effgen.de](mailto:info@effgen.de)  
Internet: [www.effgen.com](http://www.effgen.com)

**Important Notice:**

Abrasives with diamond or CBN are inert products which do not create any risk when handled or stored. When used on grinding machines they require specific measures to protect the operators. During the grinding operation 90 % or more of the particulates of the dust come from the material being ground and, for wet grinding, from aerosols generated by the grinding fluid. Specific attention must therefore be given to the nature of the part and of the fluid and the appropriate protection devices must be installed.

**2. Hazards Identification**

Diamond and boron nitride grinding tools are not dangerous products as defined in EC-Directive No. 88/379 and REACH-Directive No. 1907/2006.

**3. Composition / Information on Ingredients**

Abrasive:  Diamond  
 CBN  
 Others:

Bond:  Vitreous  
 Metal  
 Resin:  Phenol  
 Polyimid  
 Epoxide  
 Others:

Electroplated

**Diamond and Cubic Boron Nitride Grinding Tools with Electroplated Bonds**

Fillers:                     Halogen Compounds  
                               Carbides  
                               Metals (Nickel)  
                               Oxides  
                               Sulphur Compounds  
                               Others:

Core Material:             Ceramics  
                               Metal  
                               Resin

Others:                    None

**4. First-Aid Measures**

Only for application on grinding machines.

The following recommendations are basic rules during a grinding operation, they must be followed in conjunction with the information appearing in the Safety Data Sheets of the material ground and of the grinding fluid when used.

- Dust inhalation:      Remove from exposure, seek medical advice if symptoms persist.
- Eye contact:            Remove from exposure and flush with clean water. If symptoms persist seek medical advice.
- Skin contact:          No hazardous effect known.
- Ingestion:              No hazardous effect known.

**5. Fire-Fighting Measures**

None specific. Water, powder, foam, sand, CO<sub>2</sub> ... can be used if compatible with operating conditions.

**6. Accidental Release Measures**

Not applicable.

**Diamond and Cubic Boron Nitride Grinding Tools with Electroplated Bonds**

**7. Handling and Storage**

Follow recommendations for machines and national regulations.  
Store diamond and CBN abrasives in moderate constant temperature and humidity conditions.  
For detailed recommendations refer to the FEPA Safety Leaflet for diamond and CBN abrasives.

**8. Exposure Control and Personal Protection**

Not applicable when diamond or CBN grinding tools are handled or stored.

During the grinding operation with diamond or CBN abrasives particles of dust come from the material being ground. The general value for fine dust is max. 1,25 mg/m<sup>3</sup>.

When using diamond or CBN abrasives, refer to grinding machines instructions and to the national rules. Refer also to the FEPA Safety Leaflet for diamond and CBN abrasives.

The following personal protective equipment should be used dependent on the operation and the material being ground.

Eye protection: Machine guarding and safety goggles or face shield.

Dust protection: Use of dust mask.

Hand protection: Use of barrier cream and protective gloves.

Ear protection: Use of ear defenders or equivalent.

Skin protection: Use of suitable protective clothing.

Hygiene Measures: No specific requirements.

**Diamond and Cubic Boron Nitride Grinding Tools with Electroplated Bonds**

**9. Physical and Chemical Properties**

Physical state:	Solid
Colour:	Variable
Odour:	Not applicable (may give off non specific odour in use)
pH:	Not applicable
Change of physical state:	Not applicable
Density:	Not applicable
Powder density:	Not applicable
Vapour pressure:	Not applicable
Flash point:	Not applicable
Explosive properties:	Not applicable
Viscosity:	Not applicable
Solubility in water:	Not defined

**10. Stability and Reactivity**

Diamond and CBN grinding tools are stable and non reactive when handled or stored.

Conditions to avoid: Extreme heat, cold, direct sunbeam and humidity.

Material to avoid: Strong acids, strong bases and strong oxidizing agents may modify the mechanical characteristics of the products and create safety hazards when used on machines.

Hazardous decomposition products: If diamond or CBN abrasives are used in accordance with instructions no hazardous decomposition products are created.

**Diamond and Cubic Boron Nitride Grinding Tools with Electroplated Bonds**

**11. Toxicological Information**

Not applicable when handled or stored.

According to the experience gathered for many years, diamond and CBN abrasives, when properly used, have no adverse effect on health, refer to the preliminary note about dust and aerosols of grinding fluid.

**12. Ecological Information**

Mobility: Not applicable  
Persistence and degradability: Not biodegradable  
Bioaccumulative potential: Not applicable  
Ecotoxicity: Not applicable

**13. Disposal Considerations**

After use, diamond or CBN grinding tools may be contaminated with hazardous materials (particles or cooling agents) and should be disposed of in accordance with national regulations.

**14. Transport Information**

Diamond or CBN abrasives are not dangerous products.

**15. Regulatory Information**

EC-Regulations: None. No specific marking required under the EC-Directive No. 88/379 and REACH-Directive No. 1907/2006.  
National or Local Regulations: Refer to relevant texts.

**Warning!** The above indications are based on existing practice and do not constitute a guarantee. The laws and regulations must be strictly followed by the users who remain responsible for the use of diamond and CBN grinding tools.
